

Figure 4: Blockmodel of Prestige amongst U.S. Philosophy Departments, with five blocks identified. Rows and columns are ordered on similarity of voting patterns (*not* PGR ranking). Read across the rows for ratings awarded, and down the columns for ratings received. The spectrum at the bottom of the plot gives the range of color values. Colors to the left (purples, blues) represent higher ratings; those to the right (greens, yellows) represent lower ratings. Blocks are identified by thicker horizontal lines.
